

# DOs & DON'Ts

Dynamization Session  
“Bringing Supercomputing to Businesses”

11 March 2024

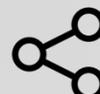

# “Bringing Supercomputing to Businesses”

## Supercomputing, Big Data, and Artificial Intelligence

### Envisioning the future

-  Forward-thinking envisioned ideal future scenarios (5-10 years)
  -  Explored contributions of HPC, Big Data and AI to competitiveness
  -  Acces to technologies and showed sector advancements
  -  Achievements and desired outcomes
- How would Supercomputing, Big Data, and Artificial Intelligence contribute to companies' competitiveness?
  - What would access to these technologies look like for businesses?
  - What advancements could be achieved in specific sectors or areas of knowledge? And what are the desired impacts?

### Reflecting on NCCs' role

-  Identifying challenges
-  Sharing ideas
-  Guiding our path forward

**23**  
**attendees**

### Generating Solutions Together

-  Participants proposed solutions to challenges.
-  Each participant prioritized three proposals, which were documented with rankings.

**Impulsando la tecnología**

**Jornada de promoción de la supercomputación para empresas**

¡Inspírate con casos de uso de HPC para la innovación empresarial y descubre lo que podría hacer para tu negocio!

12 Septiembre, 2023  
10:00 am - 16:30 pm  
Barcelona Supercomputing Center (Hybrid)

Logos: EuroCC SPAIN, DIH.CAT, X4HPC, ACCIÓ, Generalitat de Catalunya

# Our DOs

## Relevant Case Studies

Showcase successful implementations of supercomputing in similar industries

## Group Work sessions

Foster collaborative discussions on applying supercomputing to real business challenges

## Industry leader's Insights

Invite experts to share experiences and best practices

## Personalized Guidance

Offer tailored advice for companies interested in adopting supercomputing solutions

**DO**

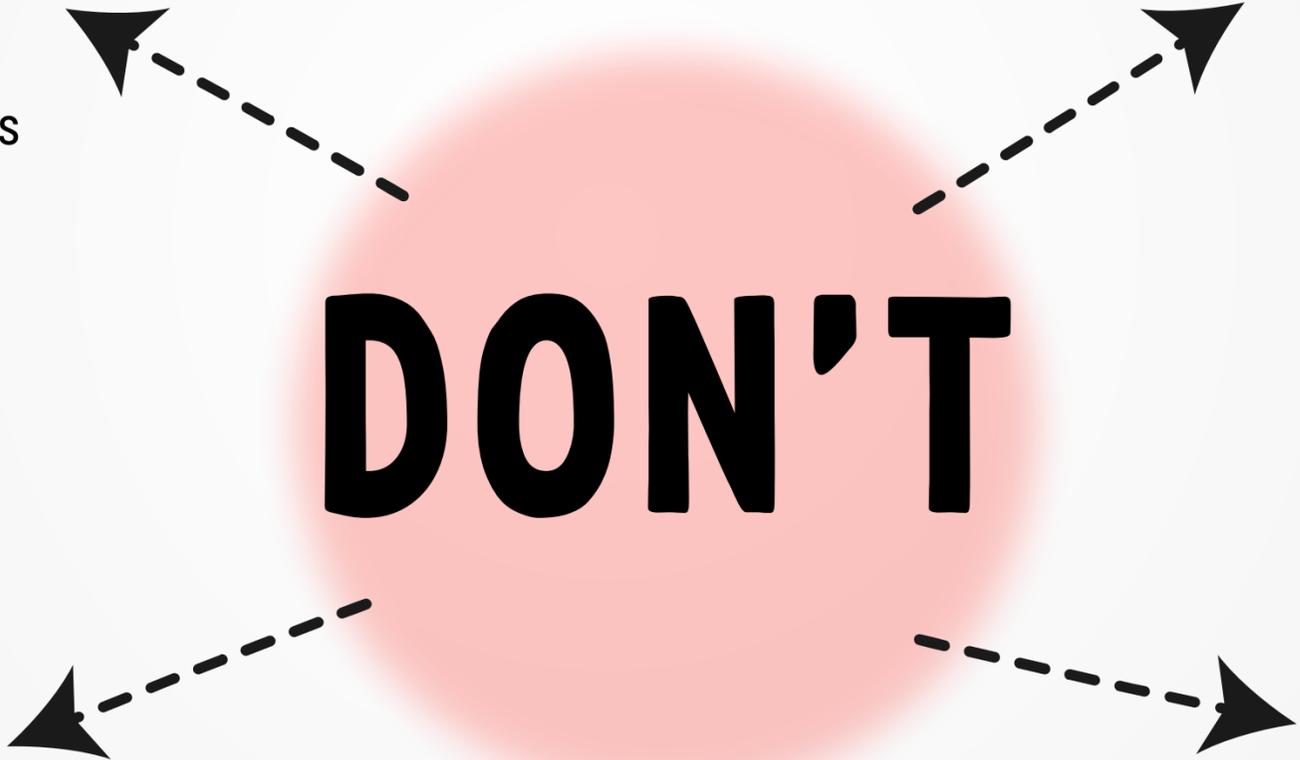

# Our DON'Ts

## Ignore specific concerns

Address practical and financial considerations alongside technical aspects

## Cut the interaction

Ensure participants can engage with experts directly

# DON'T

## Discontinue support

Offer clear pathways for continued assistance post-event

## Forget actual applications examples

Invite experts to share experiences and best practices
